Professional Summary

Data Science undergraduate with hands-on experience designing end-to-end machine learning and analytics solutions through academic and industry projects. Skilled in Python, SQL, FastAPI, Scikit-learn, predictive analytics, ETL, and backend development with a strong focus on solving real-world business problems.

Technical Skills

Languages: Python, SQL, Java, C++, HTML

Data Science: Pandas, NumPy, Scikit-learn, PyTorch, Feature Engineering, EDA, Random Forest, PCA, Time Series

Backend: FastAPI, Flask, REST APIs, JWT, Redis, Celery

Databases: PostgreSQL, MySQL, Supabase

Visualization: Matplotlib, Seaborn, Plotly, Excel

Tools: Git, GitHub, Docker, VS Code, Google Colab, Vercel, Netlify

Experience

Data Science Intern

May 2026 – Jun 2026

Hindalco Industries Ltd. – IT Department

- Independently designed and developed **SupplyChainIQ**, an AI-powered supply chain intelligence platform.
- Built ETL and preprocessing pipelines using Python, Pandas and NumPy.
- Implemented a Random Forest Classifier for shipment delay prediction and a Random Forest Regressor for demand forecasting.
- Developed supplier risk scoring and inventory optimization modules; integrated FastAPI backend with Supabase/PostgreSQL.
- Delivered a complete working application, technical report and final presentation; awarded internship completion certificate.

Projects

SupplyChainIQ – AI-Powered Supply Chain Intelligence Platform

- Built an end-to-end ML platform for demand forecasting, shipment delay prediction, supplier performance analysis and inventory optimization.
- Developed FastAPI backend, analytics dashboards and ML pipelines using Python, Scikit-learn and Supabase.
- GitHub: AI-Powered-Supply-Chain-Intelligence-Platform

Authentix – AI-Based Fake & Impersonation Account Detection System

- Developed ML pipelines using Random Forest, Gradient Boosting and Logistic Regression for fake account detection.
- Implemented preprocessing, feature engineering and backend integration.
- GitHub: Authentix

Naami – College Event & Networking Platform

- Designed backend architecture, REST APIs and authentication using FastAPI, PostgreSQL and Redis.
- Contributed 50+ API endpoints and scalable backend workflows.
- GitHub: Naami – College Event & Networking Platform

IoT-Based Crop Recommendation System

- Led dataset research, preprocessing and Random Forest model development.
- Ranked 21st among 650 teams during SIH 2025 internal selection.
- GitHub: IoT-Based Crop Recommendation System

Education

B.Tech, Computer Science & Engineering (Data Science)

Bennett University

CGPA: 7.21/10

Expected 2028

Achievements

- Smart India Hackathon 2025 – Ranked 21st among 650 teams (internal selection).
- Hackaccino 4.0 – Ranked 65th among 250 teams.

- PR & Outreach Co-Head, Solace Studios Technical Club.

Certifications

Python Fundamentals – Infosys Springboard (2024)

Core Java Programming Revisited – Infosys Springboard (2025)
